Fujitsu ETERNUS DX80 S2 Disk Storage System

The Flexible Data Safe for Dynamic Infrastructures.

ETERNUS DX S2 DISK STORAGE SYSTEMS

The Fujitsu second generation of ETERNUS DX disk storage systems, ETERNUS DX S2, are The Flexible Data Safe for Dynamic Infrastructures. Enterprise-proven capabilities protect data assets across all types of IT infrastructure. Redundant components, RAID protection and build-in data protection provide the highest system reliability to ensure business continuity is maintained.

ETERNUS DX S2 models are comprehensive disk storage platforms with superior scalability to address the demands of intensive data growth and highest performance. Free choice of modular disk storage and state-of-the-art connectivity across the entire model range delivers maximum configuration flexibility allowing choice in performance and TCO. Data-in-place upgrade options are also available throughout the system's lifecycle to ensure maximum investment protection.

The unified ETERNUS SF storage management software enables single point administration, easy data protection and efficient operation across the entire ETERNUS DX range. In virtualized IT environments in particular, ETERNUS SF perfectly integrates the powerful ETERNUS DX disk storage with minimal administration effort.

ETERNUS DX80 S2

The ETERNUS DX80 S2 with Intel® Xeon® processors is a reliable and flexible disk storage system for medium-sized IT environments. It offers an outstanding price/performance ratio and is easy to manage, thus reducing operational effort. It provides remarkable scalability with storage capacity of up to 480 TB, thus offering enough headroom for future growth. The flexible support for different network connectivity and disk types (SAS, Nearline SAS and SSD) provides a choice between cost and performance optimization. The ETERNUS DX80 offers Thin Provisioning allowing a more cost-efficient use of storage capacity right from the start. Data-in-place upgrades lead seamlessly to the next higher ETERNUS DX system, thus ensuring flexibility and investment protection. The enclosed ETERNUS SF Express software reduces administration work and provides data safety functionality.
